

Synoptic for Makeup18-19

Q1	a) list down system software=01 mark comparison based on their working=04 marks a) types of os=01 marks working and explanation of each type=04 marks (at least 4 types of os)
Q2	a) Gantt chart=02 marks Avg waiting time=Preemptive=6.5ms=02 marks Avg waiting time=FCFS=8.75ms=02 marks a) diagram=02 marks computation of Ubound, U=02 marks conclusion: schedulable or not with explanation=02 marks Not Schedulable b) At least 4 points each carrying 1 mark
Q3	a) Semaphore definition=01 mark 1. Critical section problem= 03 marks (define problem=01 mark, semaphore code=01 mark, working=01 mark) 2. Define problem=01 mark, working of semaphore with example=02 marks 3. Semaphore initialization for example=01 mark, working with example=02 marks a) need matrix content=02 marks No, system is not in safe state, explanation=08 marks with safe state algorithm b) list down conditions=01 mark explanation of each=04 mark
Q4	a) First fit will be best - FF = 01 mark, BF = 01 mark, WF = 01 mark. b) drawbacks of paging (01 marks) Conclusion = 2 marks Diagram for TLB=02 mark Example=02 marks c) page fault definition=01 mark no of page fault Optimal=5=03 marks c) FIFO=6=03 marks LRU=6=03 marks Number of Cylinders FCFS=02 mark SSTF=02 mark SCAN= 237 (02 mark) C-SCAN=387 (02 mark) Look = 02 marks
Q5	a) list=01 mark explanation of each=05 marks c) goals=01 mark, principles=01 mark, domain structure=02 marks
